FARNAM'S CHRYSANTHEMUM FARM

WEST RIVER MOUNTAIN ROAD

DELAWARE, ARKANSAS

DEAR FLOWER-LOVING FRIENDS:

It is with great satisfaction that we send our 1953 descriptive list to you. This season we are offering GRAND CHAMPION varieties only. Originated by the most famous floriculturists in the country. Our prices are reasonable for such fine, OUTSTANDING MUMS.

We are very anxious to receive your orders. We assure you that you will be satisfied with our plants, method of packing, etc.

Thanking you again for your orders in the past, and hoping to serve you again in the future, wishing you all much enjoyment in your garden, may it grow more beautiful year after year.

Faithfully yours,

M. FARNAM.

A FEW POINTERS FOR A BUMPER CROP OF BLOOMS

Use a tablespoonful of commercial fertilizer per plant to give plants a good start.

Eighteen inches apart, each way, is sufficient.

When Mum plants are young, cut back the stems to promote a bushier type of plant.

Nicotine sulphate (Black Leaf .40) will kill aphids.

Commercial plant food and liquid manure will aid in producing a bumper crop.

Water, and plenty of it, is perhaps the most important factor in Chrysanthemum culture from August 'til flowering time. A mulch will prove highly beneficial at this time.

The manner of disbudding large-flowering varieties grown for specimen or exhibition purposes should retain the crown or center bud.

D. D. T. 5% dust or spray will keep bugs off.

Window boxes are beautiful planted with Mums. Just transplant at blooming time, water well.

OUR GUARANTEE

We guarantee safe arrival of all shipments within the United States. Plants that reach you in poor condition or that are not exactly as represented in our catalog may be returned immediately. We will replace at once or refund your money, whichever you prefer. Complaints must be made within five days of shipment. Beyond this, plants are subject to conditions outside of our control. Good culture and care are of first importance. This is the purchaser's responsibility. Nevertheless, we are interested in your complete success and if for any reason any plants received from us do not grow satisfactorily, tell us so, will you?

SUBSTITUTION—Your permission to substitute the nearest variety, if this is necessary, will expedite your shipment. A variety of equal or better value will be supplied, plus one extra for good measure.

GARDEN MUMS

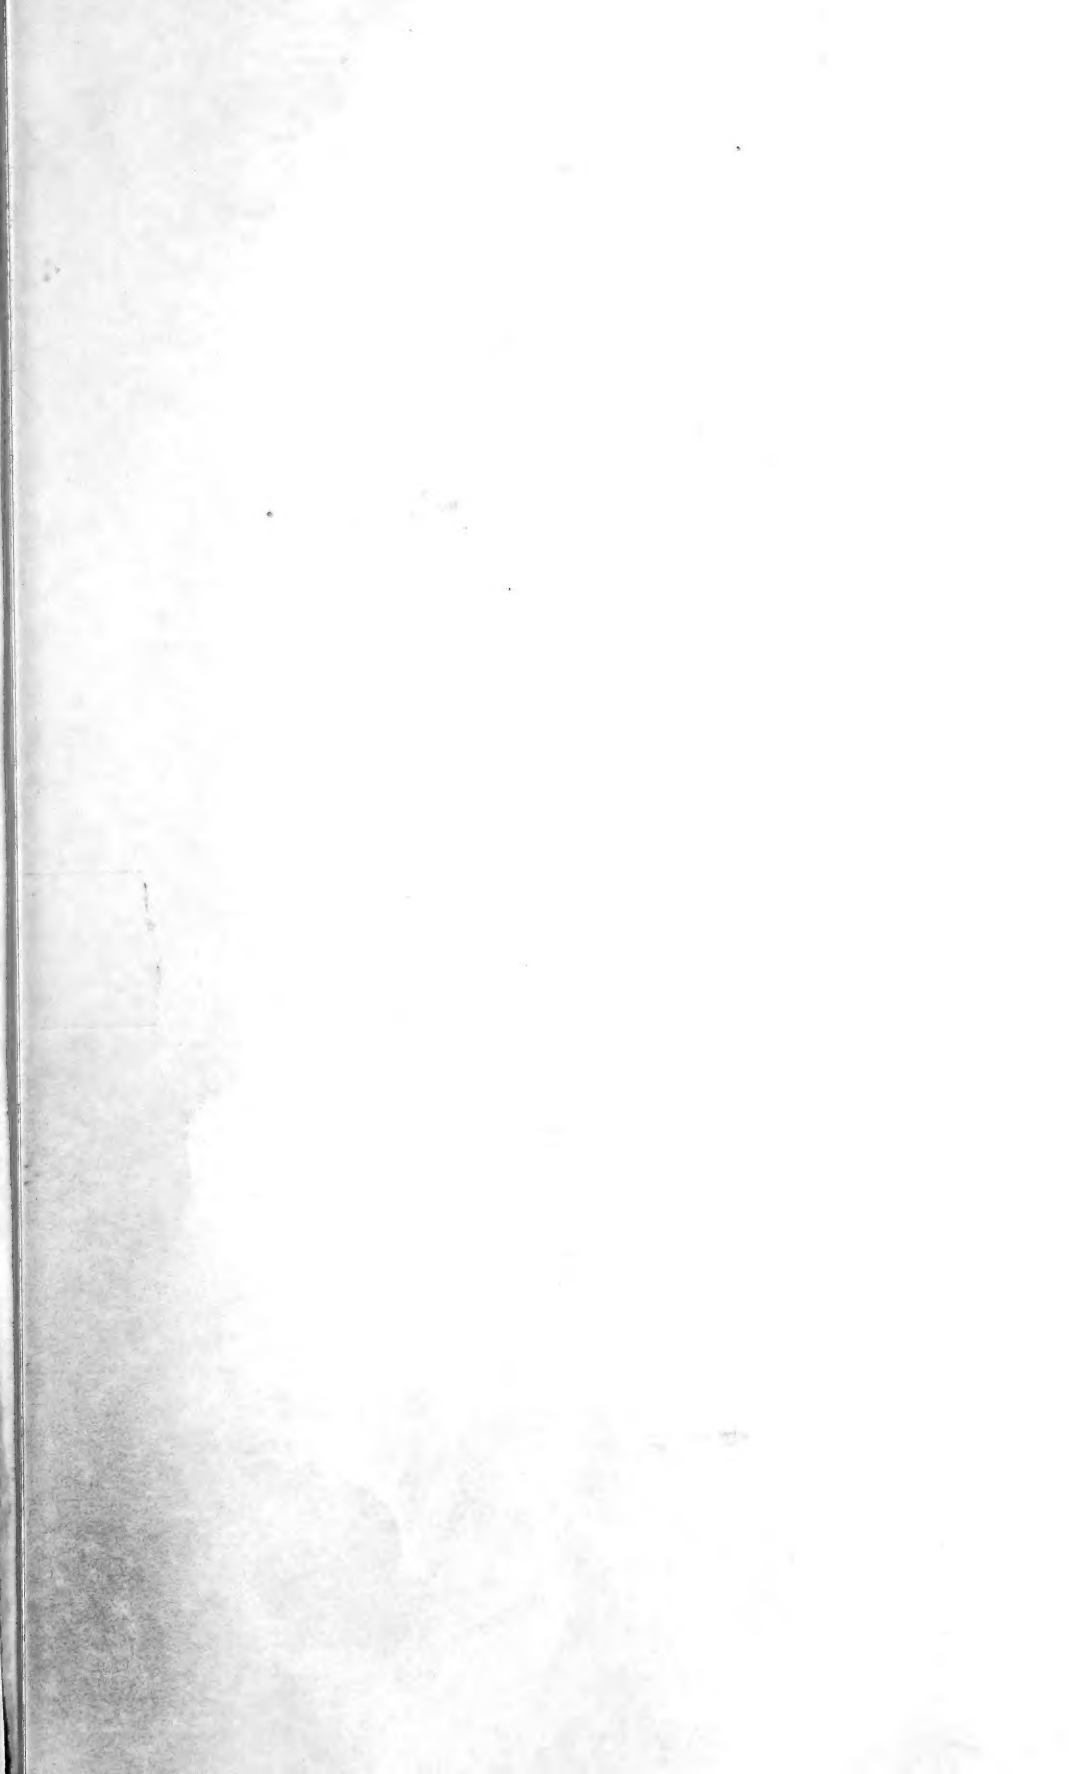

Grand Champions—they have all been tested for winter hardiness, are free and early bloomers, have disease-resistant foliage. Most are frost and rain resistant, and are all of the highest quality.

Field grown divisions. State inspected for disease and harmful insects. Guaranteed true to name.

GROW THE BIG GREENHOUSE MUMS IN YOUR GARDEN

In the North they can be grown outside in the garden until frost time, then potted up and brought indoors. To produce those big flowers they must be dis-budded, leaving from one to three flowers per plant and grown tied to a stake. Well-grown specimens are a magnificent sight at blooming time.
